DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 is rejected under 35 U.S.C. 103(a) as being unpatentable over APA (applicant admitted prior art) in view of Matuszawa Kinya (JP 408-191561A).

APA substantially teaches the claim invention except that it does not show the electrically insulating layer being composed of a material resistant to permeation by sulfur compound where in the bobbin and outer molding are composed of a thermosetting resin.

Kinya discloses in fig. 1-4 an electromotive device comprising a coil 15 and an electrically insulating layer (32) wound onto a bobbin (14) and embedded in an outer molding consisting of thermosetting resin. It's inherent that the insulating layer would be resistant to permeation by sulfur compounds. Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention of APA with the thermosetting resin of Kinya for the purpose of preventing short-circuiting between conducting wires.
